Experience

Infinitie Technology | Bhuj

Dec. 2023 – Present

- I have experience as a Fullstack Developer specializing in Next.js, a popular React framework for building server-side rendered and static web applications. My responsibilities include designing and developing scalable and efficient web applications, implementing responsive user interfaces, integrating backend services, and optimizing performance.

PROJECTS

useMovie | [Project Link](#)

Sep. 2023

- Developed a web application for movie information using React.js, integrating OMDB API.
- This provides users with a way to explore movies, rate them, and manage their watched movies list.

Maheshwari Commodities | [Project Link](#)

June. 2022

- Developed website using HTML, CSS, Vanilla JavaScript.
- Created a web Site for importing and exporting grains and beans. The platform was built to streamline the process of connecting buyers and sellers from all around the world.

ImageCivil | [Project Link](#)

Aug. 2023

- Developed website using HTML, Tailwind CSS, Vanilla JavaScript.
- Developed a portfolio website to showcase work in civil engineering, including various projects and achievements. Integrated a user-friendly interface with interactive features for easy navigation and exploration of engineering projects.

eRestro - Single Vendor Restaurant | [Project Link](#)

Jan. 2024

- eRestro offers a full-featured Food Delivery Restaurant management system, including user and delivery apps, with a powerful admin panel built on the CodeIgniter framework for streamlined restaurant business management.

MedSers | [Project Link](#)

Feb. 2024

- I developed MedSers.com, an online medicine delivery platform, utilizing WhatsApp Cloud API for seamless ordering. Additionally, I integrated an admin panel using the Vuexy template within Next.js 14 for efficient management.
